Introduction

This fifth edition of ICPR's World Female Imprisonment List shows the number of women and girls held in penal institutions in 221 prison systems in independent countries and dependent territories. The figures include both pre-trial detainees/remand prisoners and those who have been convicted and sentenced. The List also shows the percentage of women and girls within each national prison population and the number of imprisoned women and girls per 100,000 of the national population (the female prison population rate). The information is the latest available at the beginning of August 2022. In addition, this edition includes information about trends in female prison population levels since about 2000.

Both the World Female Imprisonment List and the World Prison Population List (the thirteenth edition of which was published in 2021) complement the information held in the World Prison Brief online database at www.prisonstudies.org. The World Prison Brief is updated monthly.

The World Female Imprisonment List is compiled, like the World Prison Population List, from a variety of sources. In almost all cases the original source is the national prison administration of the country concerned or the Ministry responsible for the prison administration. Most of the figures are recent and efforts are continually made to update them and to obtain information on the number of female prisoners in the few countries on which figures are not currently available (Cuba, Eritrea, North Korea, Somalia and Uzbekistan). We welcome the assistance of readers in notifying us of the latest figures. Care has been taken to ensure that the List is as accurate as possible but we cannot guarantee the reliability of every figure and readers are also invited to draw attention to any errors they notice and, if possible, to supply corrections.

It is hoped that this edition of the World Female Imprisonment List will be useful for policy makers, prison administrators, academics, non-governmental organisations, other criminal justice experts and everyone who is interested in the extent and implications of female imprisonment.

1. Helen Fair is a Research Fellow at the Institute for Crime & Justice Policy Research (ICPR) and a researcher on the World Prison Brief, a comprehensive online database on the prison systems of the world, which can be accessed free of charge at www.prisonstudies.org
2. Roy Walmsley is Honorary Senior Research Fellow at ICPR in the School of Law, Birkbeck. He founded the World Prison Brief and the World Prison Population List, along with the complementary lists on female imprisonment and pre-trial/remand imprisonment.

Key points

- ▶ This report shows that **more than 740,000 women and girls are held in penal institutions throughout the world**, either as pre-trial detainees/remand prisoners or having been convicted and sentenced. Figures for five countries are not available and those for China are incomplete. The actual total is therefore higher still.
- ▶ **More than 200,000 female prisoners are in the United States of America** (about 211,375). The countries with the next highest totals are China (145,000 plus an unknown number of women and girls in pre-trial detention and ‘administrative detention’), Brazil (42,694), Russia (39,120), Thailand (32,952), India (22,918), Philippines (16,439), Vietnam (15,152), Indonesia (13,709), Mexico (12,782), Turkey (12,242) and Myanmar (9,807).
- ▶ The countries with the **highest female prison population rate** – that is, the number of female prisoners per 100,000 of the national population – are the USA (64), Thailand (47), El Salvador (42), Turkmenistan (38), Brunei Darussalam (36), Macau-China (32), Belarus (30), Uruguay (29), Rwanda (28) and Russia (27).*
- ▶ **There are also considerable variations between continents** in the female prison population rate. Africa has the lowest rate, at 3 per 100,000 of the national population. In Asia, the rate is 7 (9 excluding China and India); in Europe, 10 (7 excluding Russia); in Oceania 10; and in the Americas, 30 (14 excluding the USA.). (See Table 6.)
- ▶ **The number of women and girls in prison worldwide has increased by nearly 60% since 2000**, when the total was estimated as approximately 466,000. Over the same period, male prisoner numbers have increased by around 22%, and general population growth (according to United Nations figures) has been around 30%.
- ▶ **In Asia, the total number of female prisoners has more than doubled since 2000**, while the general population increased by 26%. In Oceania and the Americas also, the increase in female prisoner numbers has outstripped general population growth. In Africa, female prisoner numbers have risen more slowly than the general population. Europe has seen a fall (of 13%) in the female prison population, alongside a slight increase in the general population. (Excluding Russian numbers, Europe’s female prison population has risen by about 8%, compared to general population growth of under 6%.) (See Table 7.)
- ▶ **Some countries have seen particularly sharp rises since 2000** in their numbers of women and girls in prison. This is most notable in central America (El Salvador’s female prison population has increased more than sevenfold, and Guatemala’s sixfold); South America (a fourfold increase in Brazil); and south-eastern Asia (a ninefold increase in Cambodia and an almost eightfold increase in Indonesia).
- ▶ **Women and girls make up 6.9% of the global prison population.** In African countries, the proportion of female prisoners is 3.3%, compared to 5.9% in Europe, 6.7% in Oceania, 7.2% in Asia, and 8.0% in the Americas. (The figure for the Americas is skewed by the large female prison population in the USA; excluding the USA, 5.5% of prisoners in the Americas are women and girls.)
- ▶ **In 17 jurisdictions around the world, women and girls make up more than 10% of the prison population.** Those with the highest proportions of female prisoners are Hong Kong-China (19.7%), Qatar (14.7%), Macau-China (14.1%), Laos (13.7%), Myanmar (12.3%), Vietnam (12.1%), Brunei Darussalam (11.9%), United Arab Emirates (11.7%), Thailand (11.5%) and Guatemala (11.3%).*

*Excluding some very small jurisdictions.

Tables 1-5 below set out the female prison population total, percentage, rate and trend for each jurisdiction, by continent. The summary figures for each continent are shown in Table 6; and changes for each continent since 2000 are presented in Table 7.
